

The image displays a network graph with a central hub-and-spoke structure. A large blue node is located in the upper left quadrant. From this node, a series of edges lead to a central cluster of nodes. This central cluster includes several red nodes, a few green nodes, and a small group of yellow and cyan nodes. From the central cluster, multiple edges branch out to various other nodes, including a long chain of blue nodes extending towards the top left, and several smaller clusters of blue, red, green, and cyan nodes. The overall structure is complex and interconnected, with a clear central hub and many peripheral nodes.
