

The image displays a network graph with a central hub-and-spoke structure. The central node is a large orange circle. It is connected to several other nodes, including a large green circle, a large cyan circle, and a large blue circle. These central nodes are further connected to a dense network of smaller nodes in various colors (blue, green, orange, red, cyan). The graph has a branching structure with several paths extending outwards from the center. The nodes are connected by grey lines, and the overall layout is complex and non-linear.
